THERE'S NO ROOM FOR ERROR.

When your forging application is critical, your choice is Electralloy.

Your specialized forgings need to perform to ever-escalating demands. At higher temperatures. To greater depths. In more corrosive environments. All with the expectations of longer life cycles, enhanced performance and productivity.

Electralloy specialty alloys—in ingot, pig, billet, bar and G.O. Carlson plate products—can get the job done.

Our proven ability to deliver consistent quality, superior cleanliness and exact chemistries provides

the unsurpassed reliability you need for specialty forgings, extrusions and rolled rings.

Choose from a wide range of grades: Stainless, Nitronic®, Copper-Nickel, Duplex, Super Duplex, and Nickel Alloys. In 4" - 32" rounds and RCS. AOD ingots from 21" - 63". ESR/VAR round ingots from 20" - 44". Condition ground to peeled/polished.

Make no mistake: for specialty alloys with uncompromising quality, in the toughest applications, Electralloy is your choice.
